Art Unit: 1652

Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claims 124-125, 133, 146-159, 178-179, drawn to a method of making a bispecific antibody comprising 4 different combinations of antibody fragments, a bispecific antibody, a vector, a host cell, a bacteriophage and a gene, classified in class 435, subclass 188.5, 320.1, 252.3, class 530, subclass 387.3 and class 536, subclass 23.4.
- II. Claims 126, 134-135, 160-173, drawn to a method of making a bispecific antibody comprising different combinations of fragments, a bispecific antibody, a vector, a host cell and a bacteriophage, classified in class 435, subclass 188.5, 320.1, 252.3 and class 530, subclass 387.3.
- III. Claims 127, 136-137, drawn to a method of making a bispecific antibody comprising different combinations of fragments, classified in class 435, subclass 188.5 and class 530, subclass 387.3.
- IV. Claims 138-143, drawn to a method of making a bispecific antibody comprising different combinations of fragments, classified in class 435, subclass 188.5 and class 530, subclass 387.3.
- V. Claims 144-145, 174-175, drawn to a method of making a bispecific antibody comprising different combinations of fragments and a bispecific antibody, classified in class 435, subclass 188.5 and class 530, subclass 387.3.
- VI. Claims 176-177 and 180-181, drawn to an antibody comprising specific fragments and a gene, classified in class 530, subclass 387.3 and class 536, subclass 23.4.

Art Unit: 1652

The inventions are independent or distinct, each from the other because:

Each of the groups are drawn to bispecific antibodies having different combinations of antibody fragments, genes, vectors and host cells.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
